## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method of controlling a bias voltage of a Mach-Zehnder modulator, classified in class 359, subclass 239.
- II. Claims 11-22, drawn to an apparatus for controlling a bias voltage of an input Mach-Zehnder modulator and an output Mach-Zehnder modulator, classified in class 359, subclass 245.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a materially different process of using the product. Specifically, the apparatus for controlling a bias voltage of an input Mach-Zehnder modulator and an output Mach-Zehnder modulator can be used in a process that does not include demodulating a recovered digital pilot signal to produce a feedback signaling controlling the bias voltage of the Mach-Zehnder modulator.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2873

Because these inventions are distinct for the reasons given above and the search required for any one group is not required for any other group, restriction for examination purposes as indicated is proper.

A telephone call was made to Eamon Wall on April 7, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica T. Stultz whose telephone number is (571) 272-2339. The examiner can normally be reached on M-F 8-4:30.
